15

WARNINGS

Category	Checks	Passed	Failed	Warnings	Score
Speed & Performance	33	21	5	7	64%
SEO On-Page	27	17	3	7	63%
Usability	3	2	0	1	67%

Detailed scan results for each SEO category follow on the next pages.

Speed & Performance

21 of 33 checks passed

64%

54 milliseconds

Excellent — your server responds in **54 ms**, well under the industry benchmark of **200 ms**.

Server Response Time

0.054 seconds

Excellent — your site fully loads in **0.05 seconds**, beating the industry benchmark of **2 seconds**.

Site Loading Speed Test

No GZip Compression

Critical — Although a compression header is present, the compressed content size remains **77851** bytes, indicating that compression is ineffective. Please review your server configuration to ensure that compression (gzip, Brotli, etc.) is correctly reducing the payload size.

HTML Compression/GZIP Test

HTML Minification Effective

Excellent — Your HTML is effectively minified. The file size is already optimized, with a minimal reduction potential of **3.32%**.

HTML Minification

CSS Files Partially Minified

Warning — Out of **4** external CSS files, **2** are minified. Enhancing minification for these files can further boost your site's performance, reduce bandwidth usage, and improve SEO.

CSS Minification Test

```
1: https://cdn-idinh.nitrocdn.com/GkhePegAsmwurGKLRvHrNfXpWduBSrnm/assets/static/optimized/rev-9031e8b/www.aaravinfotech.com/combinedCss/nitro-min-noimport-53a9e9ce443cca6a4d26c9bb2349307a-stylesheet.css
2: https://cdn-idinh.nitrocdn.com/GkhePegAsmwurGKLRvHrNfXpWduBSrnm/assets/static/optimized/rev-9031e8b/www.aaravinfotech.com/externalFontFace/nitro-min-noimport-3e72e885d463b0510474abab80774e7b-stylesheet.css
```

JS Files Partially Minified

Warning — Out of **5** external JavaScript files, **1** are minified. Enhancing minification for these scripts can further boost your site's performance, reduce bandwidth usage, and improve SEO.

JavaScript Minification Test

```
1: https://cdn.popt.in/pixel.js?id=84653669f7b93
2: https://www.aaravinfotech.com/js/ihavecookies/jquery.ihavecookies.js
3: https://www.google.com/recaptcha/api.js
4: https://cdn.jsdelivr.net/npm/intl-tel-input@18.1.1/build/js/utills.js
```

Enabled

Excellent — Keep?Alive is enabled.

Keep-Alive Check

Error: Call to undefined method Seoready_model::getFinalHostAfterRedirects()

WWW / NON-WWW Resolve

Canonicalized

IP Canonicalization	Excellent — Domain canonicalization is correctly configured. The domain consistently resolves to a valid IP address, ensuring reliable DNS responses, enhanced security, and efficient load balancing.
Embedded Objects	 Embedded Objects Found Critical — Embedded objects (iframe or object) detected on your page. These elements can introduce security vulnerabilities if not properly managed, increasing the risk of malicious content infiltrating your site. To protect your users and improve your site's security posture, review and secure these elements.
HTML Page Size Test	 Excessive HTML Page Size KB Critical — Your webpage's HTML size is 522.02 KB, significantly larger than the recommended size of 33 KB. Large HTML size negatively impacts load speed, SEO, and user experience. Immediate optimization is recommended by compressing content, using external CSS/JS, and reducing DOM complexity.
DOM Size Test	 Excessive DOM Size Nodes Critical — Your webpage's DOM has 3654 nodes, significantly exceeding the recommended maximum of 1500 . Excessive DOM size impacts website speed, SEO rankings, and user experience. Immediate optimization by reducing unnecessary HTML elements, simplifying layout, and using efficient coding practices is strongly recommended.
Page Objects Test	 Error: Call to undefined method Seoready_model::formatSize()
Page Cache Test (Server Side Caching)	 Page Caching Enabled Excellent — Caching is detected. <pre>1: cache-control: no-cache 2: expires: Thu, 19 Nov 1981 08:52:00 GMT 3: pragma: no-cache 4: vary: Accept-Encoding</pre>
Flash Test	 No Flash Detected Excellent — Your website does not use Flash, which is a deprecated and insecure technology.
CDN Usage Test	 CDN Usage Detected Excellent — Your website uses CDN(s). Using a CDN enhances load speed, improves site performance globally, and provides a better user experience. <pre>1: nitrocdn.com 15: googleapis.com 16: cloudflare.com 17: amazonaws.com 18: cdn.jsdelivr.net 21: zapwp.com</pre>
Modern Image Format Test	 Partial Modern Image Format Usage Warning — Only 5 out of 236 images use modern formats. Converting the remaining images (231) to modern formats (WebP, AVIF, SVG) will substantially enhance loading performance and improve user experience.

Largest Contentful Paint Test	Excellent — Your desktop webpage's Largest Contentful Paint is 0ms , meaning key content loads quickly.
Cumulative Layout Shift Test	 Excellent — Your desktop webpage's Cumulative Layout Shift (CLS) score is 0.000 .
Speed Index Test	 0 s Excellent — Your desktop webpage's Speed Index is 0ms , which means that most of your content loads quickly.
Interaction to Next Paint (INP) Test	 0ms Excellent — Your desktop webpage's Interaction to Next Paint is 0ms , meaning the page reacts to user interactions almost immediately.
Total Blocking Time (TBT) Test	 0 s Excellent — Your desktop webpage's Total Blocking Time is 0ms , meaning the page remains highly responsive during loading.
Lazy Loading Test	 Many Elements Not Lazy-Loaded Critical — 10 out of 237 images/iframes lack lazy loading. This forces browsers to load all media immediately, slowing down the page. Prioritize adding `loading="lazy"` or a JavaScript fallback.

SEO On-Page

17 of 27 checks passed

63%

Structured Data Found

Excellent — Structured data (Schema.org) is implemented on your site.

Structured Data Test

Robots.txt Found

Excellent — Your robots.txt file is properly set up at <https://www.aaravinfotech.com/robots.txt>. This file helps guide search engine crawlers and enhances your site's SEO by controlling which pages are indexed.

Robots.txt Test

Sitemap.xml Found

Excellent — Your XML Sitemap is available at <https://www.aaravinfotech.com/sitemap.xml>. An up-to-date sitemap helps search engines efficiently crawl and index your website, enhancing your SEO and overall online presence.

XML Sitemap Check

Canonical Set

Excellent — Canonical URL is correctly implemented. The canonical tag ensures that search engines index the preferred version of the page, consolidating duplicate content and enhancing SEO performance.

URL Canonicalization Test

Indexable

Excellent — The page is indexable by search engines, which enhances its discoverability and SEO performance. This ensures that your valuable content can reach a wider audience.

Noindex Tag Test

Google Analytics Integrated

Excellent — Google Analytics is integrated on your website, providing comprehensive insights into user behavior, traffic, and performance metrics. This data is invaluable for optimizing your site and driving data-driven improvements.

Google Analytics Test

Google Search Console Not Directly Integrated

Warning — Although no dedicated Google Search Console meta tag was found, your site is integrated with Google Analytics or Tag Manager. For comprehensive insights and monitoring, it is recommended to add the Google Search Console verification meta tag.

Google Search Console Check

Direct hops

Excellent — No redirects detected. The URL resolves directly to the final destination.

URL Redirects Test

Heading Structure Partially Optimized

Improve — Too many H2 tags found (10). H2 tags should reinforce your main content; too many may make the topic less clear or appear as spam tactics. While your primary heading (H1) is correctly implemented, optimizing your H2 usage can further enhance content clarity and SEO performance.

Heading Tags Test

H1 and H2 Usage Structure

H1	H2
Usage Count: 1	Usage Count: 10

Website Maintenance Services with 100% Website Care and Support

Text/HTML Ratio Check

Optimal Text-to-HTML Ratio %

Excellent — Your text-to-HTML ratio is 25.6%, which is optimal.

Keywords Usage Test

Error: Call to undefined method Seoready_model::extractKeywords()

In-Page Links Check

Internal Links Present

Excellent — Your webpage contains sufficient internal links (171).

Title: Website Maintenance Services - Aarav Infotech
Length: 45

Meta Description Found

Excellent — Your meta description is properly set and of optimal length (149 characters).

Description: Get reliable website maintenance services from Aarav Infotech to ensure uptime, security, performance, and content updates for your business website.
Length: 149

Social Media Meta Tags Fully Implemented

Excellent — All recommended Open Graph and Twitter meta tags are implemented.

Unknown scan parameter

URL is SEO-Friendly

Excellent — The URL follows SEO best practices for readability and indexing.

Some Images Missing Alt Attributes

Warning — A few images (4 of 236) are missing alt attributes. Adding descriptive alt attributes helps improve accessibility, user experience, and SEO.

1: <https://www.facebook.com/tr?id=526376499549086&ev=PageView&noscript=1>
2: <https://www.aaravinfotech.com/images/demo-green-energy-home-icon-01.png>

Responsive Image Test	 Many Images Not Responsive Critical — 236 out of 236 images lack responsive attributes (`srcset`, `sizes`). Serving large images that must be scaled down negatively impacts load time, bandwidth usage, user experience, and SEO. Immediate optimization using responsive image attributes is strongly recommended.
Inline CSS Test	 Excessive Inline CSS Detected Critical — Many inline CSS styles (122) were found. Excessive inline CSS negatively affects page load speed, maintainability, and SEO. Strongly consider moving these styles into external CSS files.
Deprecated HTML Tags Test	 Minimal Deprecated HTML Detected Warning — A few deprecated HTML tags were found. Update these elements to modern HTML5 tags for better performance, accessibility, and SEO. <div style="border: 1px solid #ccc; padding: 2px; background-color: #f9f9f9;">U: 1</div>
Charset Declaration Test	 Proper Charset Declaration Found (UTF-8) Excellent — Your webpage properly declares the charset as UTF-8, ensuring compatibility, correct content rendering, and optimal SEO.
Social Media Linking Test	 Social Media Links Present Excellent — Your website is well-linked to social media profiles (facebook.com, twitter.com, instagram.com, linkedin.com, youtube.com). This strengthens your online presence, enhances user engagement, and boosts brand visibility.
Canonical Tag Test	 Canonical Tag Correctly Implemented Excellent — Canonical URL is properly set to https://www.aaravinfotech.com/website-maintenance-services.php . <div style="border: 1px solid #ccc; padding: 2px; background-color: #f9f9f9;">https://www.aaravinfotech.com/website-maintenance-services.php</div>
Nofollow Tag Test	 No Nofollow Tags Detected Critical — No nofollow tags detected (out of 317 total links). Using nofollow tags for external, sponsored, or untrusted links helps protect SEO authority.
Disallow Directive Test	 Error: Call to undefined method Seoready_model::fetchRobotsTxt()
